Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Vialen et al. (US 2001/0018342).

Regarding claims 1 and 4, Vialen teaches a method for handling an unrecoverable error on a dedicated channel for a wireless device, the method comprising: determining if the wireless device is in a CELL_DCH state (see para [0006]); determining if a layer one radio link failure has occurred (see para [0006]); in response to determining that the wireless device is in the CELL_DCH state and that radio link failure has occurred, performing radio access bearer (RAB) release steps to release radio bearers (see para [0007]); and inherently in response to determining that the wireless device is in the CELL_DCH state and that radio link failure has not occurred, not performing the RAB release steps (in para [0006], the RAB release is performed once the radio link is failure).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vialen et al. in view of the prior art admitted by Applicant in paragraph [0084] in the specification of the present application (referred to as the admitted Prior art hereinafter).

Regarding claims 2-3 and 5-6, Vialen fails to teach that the wireless device initiating a Cell Update procedure, and in response to the wireless device initiating the Cell Up-date procedure, a Universal Terrestrial Radio Access Network (UTRAN) receiving a CELL UPDATE message from the wireless device; in response to receiving the CELL UPDATE message, the UTRAN composing a CELL UPDATE CONFIRM message comprising an information element (IE) "RLC re-establish indicator (RB2, RB3 and RB4)"; and the UTRAN transmitting the CELL UPDATE CONFIRM message to the wireless device. However, these steps are conventionally well known, as taught by the admitted Prior art in paragraph [0084]. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the admitted prior art with Vialen in order to reestablish the link when the link is lost as recommended by The 3rd Generation Partnership Project (3GPP).
